Enhanced Technology/ Cellular PERS

Enhanced Technology/Cellular PERS provides personal emergency response service for consumers who do not have a traditional landline telephone. The consumer does not need a landline or a cell phone.

Cellular PERS functionality includes:

- ❑ Cellular capability that is built into the PERS unit, allowing emergency calls to go to the monitoring center by converting the signal to cellular.
- ❑ The consumer presses the help button and there is immediate response 24/7 via 2-way voice connection.

Attachment A

Emergency Response Products with Fall Detection Feature

Emergency Response Products with a fall detection feature on an electronic device can be activated by an event such as a fall and notifies the system (provider) of such an event. The enhanced fall detection capacity combines the basic elements of PERS and is designed to:

- Detect a fall and automatically place a call for help when the consumer is unable to press the help button. It immediately contacts Emergency Medical Services followed by emergency contacts when no response is made by the consumer.
